

Summary: d needed for $P_L \leq 1e-06$
(at platform natural operating point, noise_scale=1.0)

PL vs d (p = natural operating point)

Platform	Min d for PL=10^-6	Actual PL at that d
Superconducting	d=15	PL≈8.0e-07
Neutral Atoms	d=7	PL≈4.3e-07
Ion Traps	d=9	PL≈6.7e-07
